Subject: "AlgaeCal CA" Sample | Important Update

Jin Jo (Heritage Foods), and Marty Scabarozi (Jasper Products)

It was brought to our attention that you recently received a sample of an ingredient labelled "AlgaeCal CA".

This is an important update regarding the validity of the above mentioned "AlgaeCal CA" sample.

Dean Neuls, CEO of AlgaeCal is claiming that this AlgaeCal CA, is the same Brazilian marine algae (algas calcareas) as the original AlgaeCal. Dean Neuls is claiming that they are removing the exterior of the Brazilian algae and that is why this AlgaeCal CA is higher in elemental calcium, white instead of beige and all of a sudden lower in lead and arsenic levels than the original AlgaeCal.

This story is completely false, AlgaeCal CA is actually an industrial grade calcium carbonate powder made up of coral calcium and oyster shells from the Dominican Republic called Niva Kal (See Evidence Below).

This is a blatant attempt to deceive and defraud your company into going to market with a fake AlgaeCal formula, while using the marketing story of the original Certified Plant Sourced AlgaeCal that is hand harvested from the beaches of Brazil, supported by the real AlgaeCal documentation, certifications and clinical research.

It is no secret that AlgaeCal has had supply issues and since being featured on the Dr Oz Show any real AlgaeCal inventory that was even close to passing lead and arsenic levels has been sold. Now in a desperate display of greed they all of a sudden come up with a new process of removing the exterior of the algae and come up with a new AlgaeCal CA that is a different color, almost 10% higher in elemental calcium, and falls below the necessary lead and arsenic levels.

All The Evidence You Need to Prove that Your Sample of AlgaeCal CA is Not AlgaeCal at All is Below:

All of this info has been sent to the FDA and to the dozens of other companies that AlgaeCal has tried to sell AlgaeCal CA.

We urge you to have your labs to run the appropriate tests and you will see that all of the info below will make sense.

Proof of Lead Issues: See Consumer Lab Report from April 2011: Calcium Supplements Reviewed by ConsumerLab.com. AlgaeCal Plus was found to be well over the maximum levels allowed by Prop 65 Regulations.

AlgaeCal CA is Actually Niva Kal

Niva Kal is sold by Niva Minerals (<http://nivaminerals.com>) or available via WM Nutra (<http://www.wmbnutra.com/Niva.htm>)

Niva Minerals specializes in micro pulverized Calcium Carbonate obtained from rocky silts of fossils of Corals and Mollusk Marines, predomination by Oysters, of approximately 10 million years of ages. Our Mine and our Processing plant are located in **Dominican Republic** and **The rocks are selected, classified and solely milled, and having insignificant levels in percentages of Lead, Iron, Arsenic and Heavy Metals.**

Niva KAL ® Industrial Grade- SPECIFICATIONS

- Calcium is of approximately of **39% – 40%**
- The **Lead** content is inferior to **0.125 p.p.m.**

Proof that AlgaeCal has Purchased Large Quantities of Niva Kal with The Intention of Selling it as “AlgaeCal CA”

Recent Shipment Received by AlgaeCal from Dominican Republic Containing 40 Tons of Niva Kal

Port of Loading : CAUCEDO >>>>> Port of Discharge : NEW YORK >>>> ETA: July 13, 2012

**Carrier : EVERGREEN SHIPPING AGENCY >>>>> Vessel: CONTI HARMONY >>>>
Voyage No: 003N**

OBL: EGLV479200008391 >>>> **Shipper:** LMT INTERNATIONAL >>>> **Consignee:**
ALGAECAL INC C/O UNCOMMON

2 Containers – 2160 NIVA KAL - 49.90 T – Calcium Carbonate

BoneBlast Plant Based Calcium Supplement from Pure Ocean Algae

BoneBlast Plant Calcium is a unique plant source of calcium from Icelandic ocean algae. This plant source of calcium and bone building minerals is basically a food source of goodness that is easily accepted and used by your body.

You will find that plant based calcium is body friendly and more efficient than traditional calcium supplements, therefore you don't need to consume as much to get what your body needs.

BoneBlast is simply a well balanced mixture of natural organic minerals you need. Then to ensure maximum benefits BoneBlast is enhanced with Vitamins D3 and K2 (MK-7), two essential ingredients for absorption and safety.

When Your Bones Feel Young, YOU Feel Young!

BoneBlast TV, thanks to Director Charles Wahl and friends

(<http://boneblast.com/forms/popform.html?iframe=true&width=40%&height=70%>)

What Makes BoneBlast Different from All the Other Calcium Products Out There?

Body Friendly – All natural ingredients making it easy to digest, without constipation or bloating

Perfect Balance – You need much more than just calcium, BoneBlast contains dozens of vital trace minerals for a well balanced approach to bone health

More Efficient – Plant based calcium is used more efficiently by your body so less capsules for you to take each day

Completely Safe – Research shows that plant calcium doesn't attribute to arterial calcification, something that can lead to heart attacks

A Truly Pure Source of Algae – All of the goodness from BoneBlast comes from an ocean Algae harvested off the coast of Iceland where one thing is for sure, the oceans are ice cold and clean of pollutants and toxins

Try BoneBlast Now, You Won't Regret It!

Suggested Usage: As a dietary supplement take 3 caps daily preferably with meals.

Supplement Facts	
Serving Size: 3 Capsules	
Servings per Container: 30	
Amount per serving	D.V.*
Calcium (from Algae) 585 mg	59%
Magnesium (from Algae) 45 mg	11%
Vitamin D3 (Cholecalciferol) 1050 IU	263%
Vitamin K2 (as MK7) 60 MCG	75%
Aquamin TG (Lithothamnion sp.) (seaweed-Algae) 1950 mg** (Natural source of plant calcium and minerals from algae)	
* Percent Daily Value (D.V.) Based on a 2,000 Calorie Diet	
** Percent Daily Value (D.V.) Not Established	

Other Ingredients: Rice flour, hypromellose (vegetable capsule) magnesium stearate, silicon dioxide.
Allergy Statement: Contains no sugar, salt, yeast, wheat, gluten soy milk, egg, shellfish or preservatives

Note: If you are taking blood thinner medication you should avoid vitamin K2 unless otherwise directed by a physician. If pregnant or nursing please consult a physician before use. Keep out of reach of children and store in a cool dry place

What Women are Saying About BoneBlast

Finally after few days, I can say I can digest this Calcium without any side effects .. I am thrilled, I tried so many types of Calcium, I always had to stop because it was making me sick. I have a lot of food allergies and this one is the right one for me.

Product Rating: 5/5 – Very Happy

Fast shipping. Great communication. Very good customer service

Customer Service Rating: 5/5 – Very Happy

I was looking for a calcium product that was not citrate or carbonate based and hopefully algae based. So I was happy to find you and will continue to buy your product.

Product Rating: 5/5 – Very Happy

I recieved your product promptly and in good condition.

Customer Service Rating: 5/5 – Very Happy

So far so good. Only been taking it for a short while.

Product Rating: 5/5 – Very Happy

The product arrived very quickly!

Customer Service Rating: 5/5 – Very Happy

Claudia Denny, Kentucky, USA

Diane G. Dolcourt, Florida, USA

Even Dr Oz Recommends Plant and Algae Based Calcium

Whether you're a fan of Dr. Oz or not, you have to admit that he has come out with some pretty useful health tips over the years. In 2012 alone he had several small, helpful pieces of advice that had the ability to create big improvements in your health without making huge changes or sacrifices.

Among the long list of recommendations he had for health in 2012, he mentioned the use of plant-based calcium and minerals as a preventative measure to ensure bone health through-out the course of your life.

Dr Oz has also suggested the use of red mineral algae for the relief of joint pain, so basically Dr Oz has suggested or recommended algae based ingredients on several occasions and for multiple uses.

BoneBlast Calcium and Mineral Supplement

Ingredients

90 Veggie Capsules per Bottle | Serving Size: 3 Capsules | Servings Per Bottle: 30

- **Calcium:** 585mg from Ocean Algae
- **Magnesium:** 45mg from Ocean Algae
- **Vitamin D3:** 1050 IU from CHOLECALCIFEROL
- **Vitamin K2:** 60mcg from MK-7

** 1950 mg of Ocean Algae = 585 mg of elemental Calcium, and 45 mg of elemental Magnesium. The remaining Ocean Algae consists of several trace minerals that all play a role in bone health.

Calcium	Magnesium	Boron	Chromium
Copper	Iron	Manganese	Molybdenum
Nickel	Phosphorous	Potassium	Selenium
Silicon	Strontium	Vanadium	Zinc

BoneBlast Instructions:

As a dietary supplement we suggest to take 3 capsules per day, preferably with a meal.

Is There Enough Calcium in BoneBlast?

According to the latest research the average American diet contains approximately 600-700 mg of calcium, so if you are aiming for 1000 mg of calcium per day then 3 capsules of BoneBlast per day will give you the extra 585 mg of elemental calcium needed to meet your recommended intake level.

Of course if your diet is lacking in calcium rich foods, then you can definitely take 4 capsules per day to ensure you give your body the necessary amount of calcium.

Supplement Facts

Serving Size: 3 Capsules

Servings per Container: 30

Amount per serving	D.V.*
Calcium (from Algae) 585 mg	59%
Magnesium (from Algae) 45 mg	11%
Vitamin D3 (Cholecalciferol) 1050 IU	263%
Vitamin K2 (as MK7) 60 MCG	75%

Aquamin TG (Lithothamnion sp.) (seaweed-Algae) 1950 mg**
(Natural source of plant calcium and minerals from algae)

* Percent Daily Value (D.V.) Based on a 2,000 Calorie Diet
** Percent Daily Value (D.V.) Not Established

Subject: FDA Loop Holes - Ingredient Switch

Hi Guys,

Here is the spec sheet and support tests for AlgaeCal CA.

Dean Neuls

CEO

AlgaeCal Inc.

I must tell you about very recent developments with AlgaeCal: we just got tests in that indicate that the lead in the product is too high for sales into California (due to stringent Prop 65 rules). The good news is we began experimenting with using only the interior of the algae hoping that the high lead was because of the exterior of the plant- and we were correct. So we have changed our production process to discard the exterior and only mill and bag the interior - resulting in all heavy metals being much lower - a cleaner product. Also good news is that the calcium is higher (minimum is 37%) so less material is needed to provide our clinical dosage. With this higher calcium percentage 1kg of material will make 17.5 bottles (a month's supply providing the clinical dosage) rather than 12.9 bottles that the previous material did at 30% calcium.

However, we won't have this material ready to ship to you for 4-6 weeks. I'm very sorry that this will interrupt your launch plans - but it is a necessary switch we must make for legal reasons.

Please let me know if I can mail you a sample of the new material right away.

Sincerely,

Mike

This 2.5 kg AlgaeCal-CA sample was packed in 2 x 1kg bag, and 1 x 0.5kg bag total 3 bags = 2.5 kg. We don't have any info on file for AlgaeCal-CA.

No we will continue to offer both- because different companies are used to = formulating with the original (re: calcium level differences).

As to your question about discarding the exteriors: we were told that the interior may have a different Ca level - and found that was true.

The price is the same as it's the same algae. We're just choosing to discard the exterior now.

Regards,

Mike

Forged COAs Check Your AlgaeCal Samples

Evidence has been found showing that AlgaeCal was forging certificates of analysis to hide the heavy metal levels of their raw ingredient. The evidence including the lab results and Lot # involved in this cover up will be posted as it is gathered.

If you have received any of the samples listed below or any raw ingredient from AlgaeCal it would be wise to have your labs test your supplied ingredients to ensure that it matches the COA and Specification Sheet you were given.

And thank you to those that have sent in additional evidence including some of the COAs that you will see below:

Color: Beige powder

Calcium 27% min.

Magnesium 2.5%

Heavy Metals

Lead less than .5 ppm ICP-MS

Arsenic less than .2 ppm ICP-MS

Cadmium less than .2 ppm ICP-MS

Mercury less than .01 ppm ICP-MS

Actual AlgaeCal Specifications

Lot 10 (1) – Advanced Laboratories Test Results:

Lead 1.534 ppm ICP-MS USP

Arsenic 7.069 ppm ICP-MS USP

Calcium 315,200 ppm ICP-OES USP

Magnesium 34,760 ppm ICP-OES USP

Lot 10 (2) – Advanced Laboratories Test Results:

Lead 1.568 ppm ICP-MS USP

Arsenic 9.861 ppm ICP-MS USP

Calcium 38.0 % ICP-OES USP

Lot 10 (3) – Advanced Laboratories Test Results:

Lead 1.912 ppm ICP-MS USP

Arsenic 19.400 ppm ICP-MS USP

Calcium 28.1 % ICP-OES USP

Lot 50 – Advanced Laboratories Test Results (very similar to coral calcium specifications with higher calcium and lower magnesium):

Arsenic 0.107 ppm ICP-MS USP

Calcium 431,500 ppm ICP-OES USP

Magnesium 1,069 ppm ICP-OES USP

Lot 8 – Advanced Laboratories Test Results:

Lead 0.985 ppm ICP-MS/ICP-OES

Arsenic 0.882 ppm ICP-MS/ICP-OES

Calcium 320,500 ppm ICP-MS/ICP-OES

Magnesium 36,800 ppm ICP-MS/ICP-OES

Lot 6 – Advanced Laboratories Test Results:

Lead 0.720 ppm MS USP 31

Arsenic 0.705 ppm MS USP 31

Calcium 341,300 ppm OES USP 31

Magnesium 25,100 ppm OES USP 31

Lot 2 – Advanced Laboratories Test Results:

Lead 0.22 ppm ICP-MS

Arsenic 0.23 ppm ICP-MS

Calcium 28.3% ICP-MS

Magnesium 7.6% ICP-MS

Quite a Difference Between Each Lot and The Stated Specification Sheets?

Some AlgaeCal Formulas Might Be Nothing More than Coral Calcium

It is no secret that after AlgaeCal the ingredient was mentioned on the Dr Oz show there was tremendous demand for the ingredient and several new AlgaeCal formulas hit the market. So the story goes that when AlgaeCal was unable to supply enough of the Brazilian algae ingredient to the other supplement companies that wanted to use AlgaeCal in their formulas they started offering a coral calcium to these companies.

There is nothing wrong with selling coral calcium, but unfortunately AlgaeCal was claiming that this coral calcium was actually AlgaeCal in an attempt to deceive these companies. On average coral calcium can be purchased in bulk for a few dollars per kilogram where as AlgaeCal the ingredient is sold for over \$30-\$40 per kilogram.

[Clinical Research](#)[Coming Soon](#)[Customers](#)[Formulas](#)[Ingredients](#)[Lab Results](#)[Uncategorized](#)

Latest Comments

Mike Smith on [AlgaeCal Plus Lead Contamination and the Consumer Lab Report from](#)

Why and How

I don't have all of the details just yet but as far as I understand AlgaeCal could not find enough real AlgaeCal that was not contaminated with lead and arsenic to sell to these other companies so they decided to try blending the real AlgaeCal with coral calcium in an attempt to bring the lead and arsenic down to acceptable levels.

Then when AlgaeCal found that there was no way to consistently blend the coral calcium with the AlgaeCal they decided to go all the way and deceive people by putting the AlgaeCal name on a standard coral calcium so that they could continue to benefit from the Dr Oz demand.

New AlgaeCal that Has Higher Calcium Content and Lower in Lead?

The story going around is that AlgaeCal claimed that they found a solution to the lead and arsenic problem with their ingredient by removing the exterior of the algae. They have been claiming that the interior of the algae was lower in lead and arsenic content and higher in elemental calcium.

If you have heard this story and have been sent a sample of this Algaecal powder that is supposed to be from the interior of the algae then do yourself a favor and analyze the sample as it is simply coral calcium.

I have seen shipping documents proving that Algaecal ordered 40 tons of a coral calcium from the Dominican Republic. These shipping documents are available to anyone that searches the USA port authority records.

more info coming soon...

[About This Site](#)

[AlgaeCal History](#)

You are here: [Home](#) / About This Site, AlgaeCalFraud.com

About This Site, AlgaeCalFraud.com

The main objective behind AlgaeCalFraud.com is to give people the story behind the popular plant source calcium supplement called Algaecal. The blog posts that you will find on this site are more factual than opinion, because it is all based on first hand knowledge that I have learned from a friend that used to work for AlgaeCal.

Why Believe the Info Found on This Blog?

One of my good friends used to work with AlgaeCal and during my friend's time working with them I saw first hand the deception and fraudulent activities behind the success of AlgaeCal. These illegal and unethical actions sickened my friend and eventually lead to my friend leaving AlgaeCal because the greed and deceit became unbearable.

Not everyone will want to believe the stories on this site, and that is fine, all I want to do is deliver important information to the public, and lets let the public decide if AlgaeCal is a product that they would want to put in their bodies?

Disclaimer

My friend has not authorized any of the info on this blog, and in fact I have taken matters upon myself to publish all of the info found on this website because I believe the world should know the truth behind this potentially dangerous product that has been sold to consumers all around the world.

As you will see almost all of the info found on this site will be inside information that I have copied from my friend's computer without them knowing. Even though my friend would not approve of me publishing this info I feel that the world deserves to know the truth behind AlgaeCal.
